

Contractor Management Solution For Healthcare

How can Healthcare tackle Contractor Management inefficiencies and ensure safety and security?

CloudGate Contractor Management streamlines Healthcare contractor oversight with document uploads, vaccination tracking, automated credentialing, and resource management, enhancing security and reducing administrative burdens.

Healthcare Contractor Management Challenges

The Healthcare industry faces significant challenges in managing contractors, primarily due to inconsistent workflow standards that lead to operational inefficiencies. The process of issuing credentials is often cumbersome and, in some cases, non-existent, which complicates access control and identity verification. Poor background checks raise security and compliance concerns, potentially exposing Healthcare facilities to risks associated with unverified personnel. Additionally, tracking contractor vaccinations is not only costly but also adds to the administrative burden, further straining hospital staff resources. The cumulative effect of these pain areas is a heavy workload on hospital staff, who must navigate these complex processes while ensuring the safety and security of the Healthcare environment.

CloudGate Solution Benefits

The CloudGate Contractor Management solution offers a robust set of benefits tailored to address the specific challenges faced by the Healthcare industry in managing contractors. It introduces Contractor Portal Options, enabling quick document upload and efficient tracking, thereby streamlining the verification process. The system simplifies vaccination and certification tracking, reducing the administrative burden and costs associated with maintaining up-to-date health records. Training Lapse Alerts ensure that contractors remain compliant with necessary training requirements, enhancing safety and quality standards. The solution automates the issuance and rescindment of credentials, facilitating secure and efficient access control. Consistent and scheduled background checks are integrated into the system, improving security by ensuring that all contractors meet the required standards. Furthermore, the Vendor and Contracting Company Portal automates the onboarding process for new and replaced contractors, making it easier and faster to manage contractor replacements and additions. Lastly, Contractor Asset Tracking and Allocations feature helps in efficiently managing resources and equipment allocated to contractors, ensuring accountability and optimal resource utilization. Together, these features significantly alleviate the pain areas associated with contractor management in the Healthcare sector.

About CloudGate

CloudGate by Soloinsight is an advanced platform designed to enhance workplace experience through the automation of the management and security of physical and cyber identities in buildings. It is a comprehensive solution aimed at converging and orchestrating physical security, HR, Environmental Health and Safety (EHS), Facility Management (FM), IT, and cyber domains into a single, secure automated system for both Logical (Identity and Access Management - IAM) and Physical Identity and Access Management (PIAM) and governance. The platform is trusted by various prestigious organizations and integrates seamlessly with multiple Physical Access Control Systems (PACS) and cyber identity solutions to manage the identities and credentials of employees, contractors, and vendors, ensuring access approvals, security, privacy, and compliance across all locations.
